

## CENTER FOR PROFESSIONAL DEVELOPMENT

### **RESIDENTIAL INTERIOR DESIGNER**

120 Hours/12 Months/Instructor-Facilitated  
Course Code: **CPD114** || Course Cost: **\$1995**

#### **OVERVIEW**

Are you looking for a career where you can put your creativity and planning skills to good use? If so, this program will give you the basic skills and background you need to start working as a residential interior designer.

First, you'll find out what it's like to work as a residential interior designer for a day, and you'll see what qualities it takes to become successful in this business. You'll also learn the cornerstones of good design, such as proportion, balance, and rhythm, and discover how to plan spaces that are both beautiful and functional.

You will learn about the history of design styles and furnishings, finding out what our contemporary design aesthetic owes to the Ancient Egyptians, Greeks, and Romans. You'll also explore historical design styles that people still love today. If Modernism speaks to you more than the columns of classical Rome, don't worry—you'll get familiar with 20th-century styles and contemporary movements, too.

Building off your understanding of design basics and history, you'll have a chance to investigate the various elements of interior design: materials, color, textiles, lighting, and accessories. You'll discover how you can combine these elements to create any type of atmosphere that your clients desire.

Finally, you'll get a glimpse into the excitement of running your own design business. You'll find helpful information on establishing your business, networking with contractors and vendors, marketing, meeting with clients, and managing projects in an ethical, professional way.

Throughout the program, you'll discover useful documents and exercises to help you practice your skills and put them to use. Your work will culminate in your very first interior design project: a floor plan and complete design concept for a family room. By the end of the program, you'll be ready to seek out your first clients and help them transform their interiors into satisfying spaces.

In addition, upon completion of this program, you will be eligible to take the Residential Interior Designer Exam (RIDE) through the Designer Society of America (DSA). You'll also receive a free one-year DSA membership, and you may be able to participate in an optional 40-hour internship through DSA (where available) if you meet eligibility requirements.

#### **OBJECTIVES**

By completing the program, you will:

- Understand what a residential interior designer does.
- Be familiar with major design styles and movements throughout history.

- Know how to manipulate the basic elements involved in residential interior design projects.
- Understand the steps required to work as a residential interior designer and start your own design business.
- Have experience creating a design concept and floor plan.
