

Bachelor of Science in Health Care Management

Program (Student) Outcomes: What Will I Learn?

1. Use theories of leadership and organizational behavior to define and implement management practices in health care settings.
2. Apply principles of budgeting and finance to effectively plan and manage resources within a health care organization.
3. Use knowledge of health and illness, health care systems and health care consumers to guide decision making and promote quality within health care environments.
4. Implement the manager role using a legal and ethical framework.
5. Incorporate multiple strategies of communication to establish collaborative relationships with members of the leadership team and other stakeholders.
6. Use evidence based practice to guide human resource, clinical and administrative decisions.
7. Manage a diverse workforce in providing health care for an increasingly heterogeneous population.
8. Demonstrate a commitment to life-long learning in pursuit of excellence in managing and leading within the health care environment.

Data represented on this site includes information on programs that have been in existence longer than 3 years, and have available direct and indirect learning outcomes data on at least 20 students, or unless otherwise specified by specialized accreditation to require reporting of all results less than $n = 20$.
