

Bachelor of Science in National Security

Program (Student) Outcomes: What Will I Learn?

1. Distinguish between the instruments of power (e.g., diplomatic, information, military, economic, social) and how nation-states leverage each for strategic advantage in a competitive international environment.
2. Analyze the ethical issues surrounding the field of national security and the professional challenges arising from a career in national security
3. Assess the global security structure of the 21st century and America's strategic posture in this environment.
4. Describe the interdisciplinary character of national security (e.g., history, political science, public administration, social science, psychology, economics, military leadership, and cybersecurity).
5. Construct and analyze arguments related to issues in national and international security.

This program began enrolling students in 2016 and does not have sufficient results to present outcomes data at the program level. Data represented on this site includes information on programs that have been in existence longer than 3 years, and have available direct and indirect learning outcomes data on at least 20 students, or unless otherwise specified by specialized accreditation to require reporting of all results less than $n = 20$.
