Business Information Systems

CREDIT HOURS: 3
LEVEL: LOWER

PUBLISHED FEBRUARY 2021
The most current content guides are available at:
www.excelsior.edu/contentguides
Before You Choose This UExcel Exam

Uses for the Examination

• Excelsior College, the test developer, recommends granting three (3) semester hours of lower-level undergraduate credit to students who receive a letter grade of C or higher on this examination.

• Other colleges and universities also recognize this exam as a basis for granting credit or advanced standing.

• Individual institutions set their own policies for the amount of credit awarded and the minimum acceptable score.

Examinees who have applied to Excelsior College should ask their academic advisor where this exam fits within their degree program.

Examinees not enrolled in an Excelsior College degree program should check with the institution from which they wish to receive credit to determine whether credit will be granted and/or to find out the minimum grade required for credit. Those who intend to enroll at Excelsior College should ask an admissions counselor where this exam fits within their intended degree program.

For more information on exam availability and actual testing information, see the Exam Registration and Information Guide.

Examination Length and Scoring

This examination consists of 120 multiple choice and other type questions. You will have two (2) hours to complete the exam. Your score will be reported as a letter grade. Questions are scored either correct (1) or incorrect (0). There is no partial credit. Each credit-bearing exam contains pretest questions, which are embedded throughout the exam. They are indistinguishable from the scored questions. It is to your advantage to do your best on all the questions. Pretest questions are being tried out for use in future versions of the exam.

The UExcel exams do not have a fixed grading scale such as A = 90–100%, B = 80–90%, and so forth, as you might have seen on some exams in college courses. Each UExcel test has a scale that is set by a faculty committee and is different for each exam. The process, called standard setting, is described in more detail in the Technical Handbook. Excelsior puts each exam through a standard setting because different test questions have different levels of difficulty. To explain further, getting 70% of the questions right on the exam when the questions are easy does not show the same level of proficiency as getting 70% of questions correct when the questions are hard. Every form of a test (a form contains the test questions) has its own specific grading scale tailored to the particular questions on each exam form.

Please also note that on each form, some of the questions (referred to as pretest questions) count toward the score and some do not; the grading scale applies only to those questions that count toward the score. The area with percentage ratings on the second page of your score report is intended to help identify relative strengths and weaknesses and which content areas to emphasize, should you decide to take the examination again. Your grade
is based on only the scored questions. Therefore, the percentage ratings do not necessarily reflect the total percentage that counted toward your grade.

For the best view of the types of questions on this exam, see the sample questions in the back of this guide. Practice, practice, practice!

Score Reporting

For most of our examinations, based on performance, an examinee is awarded a letter grade of A, B, C, or F. A letter grade of D can be given, but credit is awarded for A, B, and C letter grades only. The letter grades reported to examinees indicate that their performance was equivalent to the performance of students who received the same letter grade in a comparable, on-campus course.

More specifically, the letter grade indicates the examinee’s proficiency relative to the learning outcomes specified in the exam content guide. Following are general descriptions of examinee performance at each level:

Letter Grade Description

A  Highly Competent: Examinee’s performance demonstrates an advanced level of knowledge and skill relative to the learning outcomes.

B  Competent: Examinee’s performance demonstrates a good level of knowledge and skill relative to the learning outcomes.

C  Marginally Competent: Examinee’s performance demonstrates a satisfactory level of knowledge and skill relative to the learning outcomes.

D  Not Competent (no credit recommended): Examinee’s performance demonstrates weak knowledge of the content and minimal skill relative to the learning outcomes.¹

F  Fail (no credit recommended): Examinee’s performance demonstrates no knowledge of the content and no skill in the subject relative to the learning outcomes.

Credit is transcripted by Excelsior College for examinees who achieve letter grades of C or higher.

We encourage colleges and universities to use the Excelsior College letter grades of A, B, and C as acceptable standards for awarding credit.

¹ In general, two-hour exams do not award a D letter grade.

See page 23, at the back of this content guide, for a sample UExcel Grade Report for Examinations.

Excelsior College Bookstore

The Excelsior College Bookstore offers recommended textbooks and other resources to help you prepare for UExcel exams.

The bookstore is available online at (login required): www.excelsior.edu/bookstore

Excelsior College Library

Library services are available to students enrolled in a degree program at Excelsior College. Created through our partnership with the Sheridan Libraries of The Johns Hopkins University, the library provides access to journal articles, books, websites, databases, reference services, and many other resources. To access the Excelsior College Library, visit www.excelsior.edu/library (login is required). Access to the library is available 24/7.

Take Charge of Your Own Learning

At Excelsior College, independent, self-directed study supported by resources we help you find is not a new concept. We have always stressed to students who take exams that they are acting as their own teacher, and that they should spend as much time studying for an exam as they would spend in a classroom and on homework for a corresponding college course in the same subject area.

Begin by studying the content outline contained in this content guide, at its most detailed level. You will see exactly which topics are covered, and where chapters on those topics can be found in the Recommended Resources. You will see exactly where you might need to augment your knowledge or change your approach.

The content outline, along with the learning outcomes for this exam and recommended textbooks, will serve as your primary resources.

How Long Will It Take Me to Study?

Study for a UExcel exam is comparable to an equivalent college-level course. As an independent
learner, you should study and review as much as you would for the same subject in a campus-based college course. If you already have a background in the subject, you may be able to pass the exam successfully with fewer hours of study. It depends upon the learner as well as the subject, the number of credits (for example, a 6- or 8-credit exam will require more hours of study than a 3-credit exam), and the length of the exam. We strongly encourage you to create a long-term action or study plan, so that you have a systematic approach to prepare for the exam. We've included guidelines for creating such a plan.

How Can I Create an Effective Long-Term Study Plan?

1. **Determine the time you will require to complete your preparation for this exam.** If you have not studied the subject before, you should plan to budget approximately 45 hours of study time for every credit: 135 hours for 3 credits, 180 hours for 4 credits, 270 hours for 6 credits, and 360 hours for 8 credits. These hours are rules of thumb based on expectations for a student taking a course in the subject; it may take you more or less time, depending on how familiar you are with the material and how easily you absorb the information studying on your own. Aside from the content review, you should then factor in time to search for and use other resources, and to complete any projects and assignments in the study materials that will clarify your understanding of the topics in the content outline (that part in the content guide where the specific areas of study are spelled out). Spend more time on concepts and areas in which you feel you are weak. Totaled, this is approximately the amount of time you should expect to devote to a three-credit, campus-based course. The actual amount of time you require depends on many factors, and will be approximate. If your background is weak, you may need to set aside substantially more than 135–150 hours. If your background is strong, you may budget less time.

Take a few minutes to review the content outline to assess your familiarity with the content. Then, in the space below, write the number of hours you will allocate to complete preparing for the exam.

Hours Required =

2. **Determine the time you will have available for study.**

In self-study, you need structure, as well as motivation and persistence, and a methodical approach to preparation. There is no set class to keep you on task. You have to do that yourself. Construct a time-use chart to record your daily activities over a one-week period. The most accurate way to do this is to complete the chart on a daily basis to record the actual amount of time you spend eating, sleeping, commuting, working, watching television, caring for others and yourself, reading, and everything else in an adult's life. However, if your schedule is regular, you might prefer to complete the chart in one sitting and, perhaps, by consulting your appointment book or planner.

After you have recorded your activities, you will be ready to schedule study periods around these activities or, perhaps, instead of some of them. In the space below, write the number of hours you will be able to set aside for study each week.

Hours Required =

3. **Divide the first number by the second number.**

This will give you the number of weeks you will need to set aside for independent study. For example, if you think you will require 170 hours of study and you have 10 hours available to study each week, divide 170 hours by 10 hours and you will get 17. This means that you will need about 17 weeks to complete this course of study. However, you will also need to allow about a week for review and self-testing. Moreover, to be on the safe side, you should also add two weeks to allow for unforeseen obstacles and times when you know you will not be able to study (e.g., during family illnesses or holidays). So, in this case, you should allot a total of 18 to 19 weeks to complete your study.

4. **Schedule your examination to coincide with the end of your study period.**

For example, if you plan to allow 18 weeks for study, identify a suitable examination date and begin study at least 18 weeks before that date. (The date you begin study assumes that you will have received all of your study materials, particularly textbooks, by that time.)
5. Format a long-term study plan.
You will need to use a calendar, planner, or some other tool to format and track your long-term study plan. Choose a method that is convenient and one that keeps you aware of your study habits on a daily basis. Identify the days and exact hours of each day that you will reserve for study throughout your whole independent study period. Check to see that the total number of hours you designate for study on your long-term study plan adds up to the number of hours you have determined you will need to complete this course of study (Step 1).

6. Record in your long-term study plan the content you plan to cover during each study period.
Enter the session numbers, review, and examination preparation activities you will complete during each study period. While it is suggested that approximately 160–170 hours of study is required for this exam, each and every student may require different timelines based on their comfort with, and comprehension of, the material.

You now have a tentative personal long-term study plan. Keep in mind that you will have to adjust your study plan, perhaps several times, as you study. It is only by actually beginning to work systematically through the material, using the content outline, that you will be able to determine accurately how long you should allow for each unit.

3. Be an active learner.
You should actively engage in the learning process. Read critically, take notes, and continuously monitor your comprehension. Keep a written record of your progress, highlight content you find difficult to grasp, and seek assistance from someone in your learning community who can help you if you have difficulty understanding a concept.

4. Be patient: you may not understand everything immediately.
When encountering difficulty with new material, be patient with yourself and don't give up. Understanding will come with time and further study. Sometimes you may need to take a break and come back to difficult material. This is especially true for any primary source material (original letters, documents, and so forth) that you may be asked to read. The content outline will guide you through the material and help you focus on key points. You will find that many concepts introduced in earlier sessions will be explained in more detail in later sessions.

5. Apply your learning to your daily life.
Use insights you gain from your study to better understand the world in which you live. Apply the learning whenever you can. Look for instances that support or contradict your reading on the subject.

6. Accommodate your preferred way of learning.
How do you learn best? Common ways to learn are reading, taking notes and making diagrams, and by listening to someone (on video or live). Others learn by doing. Do any of these descriptions apply to you? Or does your learning style vary with the learning situation? Decide what works for you and try to create a learning environment to accommodate your preferences.

What Learning Strategy Should I Use?
The following guidelines are intended to help you acquire the grounding in the knowledge and skills required for successful completion of this examination.

1. Approach learning with a positive attitude.
Most students are capable of learning subject content if they devote enough time and effort to the task. This devotion will give you a positive edge and a feeling of control.

2. Diligently complete the exact work you specified in your study plan.
Your study plan is being designed for the specific purpose of helping you achieve the learning outcomes for this exam.

Study Tips
Become an active user of the resource materials. Aim for understanding rather than memorization. The more active you are when you study, the more likely you will be to retain, understand, and apply the information.

The following techniques are generally considered to be active learning:
- preview or survey each chapter
• highlight or underline text you believe is important
• write questions or comments in the margins
• practice re-stating content in your own words
• relate what you are reading to the chapter title, section headings, and other organizing elements of the textbook
• find ways to engage your eyes, your ears, and your muscles, as well as your brain, in your studies
• study with a partner or a small group
• prepare your review notes as flashcards or create recordings that you can use while commuting or exercising

When you feel confident that you understand a content area, review what you have learned. Take a second look at the material to evaluate your understanding. If you have a study partner, the two of you can review by explaining the content to each other or writing test questions for each other to answer. Review questions from textbook chapters may be helpful for partner or individual study, as well.

Study smart for your UExcel exam! Success starts with establishing a relationship with your advisor.

Using UExcel Practice Exams

The official UExcel practice exams are highly recommended as part of your study plan. They can be taken using any computer with a supported web browser such as Google Chrome.

The practice exam package comes with two sets of questions. Please be aware that there will be fewer questions on the practice exams than there will be on the exam you take for credit. Generally, the practice questions will not be the same as the ones you will see when you take the actual exam for credit. They are intended to expose you to the types of questions you'll encounter in the actual exam. Practice questions are a tool, and do not provide a full exam experience. For example, the practice question sets do not have time limitations. Begin with the Content Guide, especially the detailed content outline. Memorizing specific questions and answers on the practice sets is not as effective as using the questions to practice, along with the content outline, to see which concepts you may need to study further. To register for the practice exam, visit www.excelsior.edu and log into your MyExcelsior account. Please note: You must be registered for the corresponding credit-bearing exam before you can register for the practice exam.

Practice exams are not graded. Rather, they are intended to help you make sure you understand the subject and give you a sense of what the questions will be like on the exam for credit. Ideally, you would check any questions you got wrong, look at the explanations, and go back to the textbook to reinforce your understanding. After taking both forms of the practice exam, you should feel confident in your answers and confident that you know the material listed in the content outline.

Practice exams are one of the most popular study resources. Practice exams are typically shorter than the credit-bearing exam. Since the questions are drawn from the same pool of questions that appear on the credit-bearing exam, what you will see when you sit for the graded exam will be roughly the same. Used as intended, these practice exams will enable you to:

• Review the types of questions you may encounter on the actual exam.
• Practice testing on a computer in a timed environment.
• Practice whenever and wherever it is convenient for you.

Take two different forms of a practice exam within a 180-day period. (We highly recommend that you take the first form of the practice exam as a pretest, early in the study period. Use the results to identify areas to further study and carry out a plan. Then take the second form as a post-test and see how much you have improved.) Although there is no guarantee, our research suggests that exam takers who do well on the practice exams are more likely to pass the actual exam than those who do not take advantage of the opportunity. Note that since the practice exams are not graded (calibrated) the same way as the scores on the credit-bearing exam, it will be hard for you to use the practice exams as a way to predict your score on the credit-bearing exam. The main purpose of the practice exams is for you to check your knowledge and to become comfortable with the types of questions you are likely to see in the actual, credit-bearing exam.
About Test Preparation Services

Preparation for UExcel® exams and Excelsior College® Examinations, though based on independent study, is supported by Excelsior College with a comprehensive set of exam learning resources and services designed to help you succeed. These learning resources are prepared by Excelsior College so you can be assured that they are current and cover the content you are expected to master for the exams. These resources, and your desire to learn, are usually all that you will need to succeed.

There are test-preparation companies that will offer to help you study for our examinations. Some may imply a relationship with Excelsior College and/or make claims that their products and services are all that you need to prepare for our examinations.

Excelsior College does not endorse the products and services of any tutorial or test preparation firm. We do not review the materials provided by these firms for the content or compatibility of their material and resources with UExcel® exams or Excelsior College Examinations®. No test preparation vendor is authorized to provide admissions counseling or academic advising services, or to collect any payments, on behalf of Excelsior College. Excelsior College does not send authorized representatives to a student’s home nor does it review the materials provided by test preparation companies for content or compatibility with Excelsior College examinations.

To help you become a well-informed consumer, we suggest that before you make any purchase decision regarding study materials provided by organizations other than Excelsior College, you consider the points outlined on our website at www.excelsior.edu/testprep.

Content Guides

This content guide is the most important resource. It lists the outcomes, a detailed content outline of what is covered, and textbooks and other study resources. It also has sample questions and suggestions for how to study. Content guides are updated periodically to correspond with changes in particular examinations and in textbook editions. Examinees can download any of the latest free UExcel content guides by visiting the individual exam page or from the list at www.excelsior.edu/contentguides.

Using the Content Outline

Each content area in the content outline includes the most important sections of the recommended resources for that area. These annotations are not intended to be comprehensive. You may need to refer to other chapters in the recommended textbooks. Chapter numbers and titles may differ among textbook editions.

This content outline contains examples of the types of information you should study. Although these examples are many, do not assume that everything on the exam will come from these examples. Conversely, do not expect that every detail you study will appear on the exam. Any exam is only a broad sample of all the questions that could be asked about the subject matter.

Using the Sample Questions and Rationales

Each content guide provides sample questions to illustrate those typically found on the exam. These questions are intended to give you an idea of the level of knowledge expected and the way questions are typically phrased. The sample questions do not sample the entire content of the exam and are not intended to serve as an entire practice test.

Exam Preparation Strategies

Each learner is different. However, all learners should read the content outline in the exam’s Content Guide and ensure that they have mastered the concepts. For someone with no prior knowledge of the subject, a rule of thumb is 135 hours of study for a 3-credit exam—this number is just to give you an idea of the level of effort you will need, more or less.
Recommended Resources for the Exam in Business Information Systems

The resources listed below are recommended by The resources listed below were selected by the faculty members on the examination committee for use in developing this exam.

Resources listed under “Strongly Recommended” were used by the committee to verify all the questions on the exam. Please refer to the Content Outline to see which parts of the exam are cross-referenced to these resources.

Resources listed under “Optional” provide additional material that may deepen or broaden your understanding of the subject, or that may provide an additional perspective on the exam content. Textbook resources, both Strongly Recommended and Optional, may be purchased from the Excelsior College bookstore at www.excelsior.edu/bookstore.

You should allow ample time to obtain the necessary resources and to study sufficiently before taking the exam, so plan appropriately, with an eye towards your own personal learning needs. See the sections in this guide on the Excelsior College Bookstore and the Excelsior College Library, and under Reducing Textbook Costs, to help you secure the Strongly Recommended resources successfully.

Textbook Editions

Textbook editions listed in the UExcel content guides may not be the same as those listed in the bookstore. Textbook editions may not exactly match up in terms of table of contents and organization, depending upon the edition. However, our team of exam developers checks exam content against every new textbook edition to verify that all subject areas tested in the exam are still adequately available in the study materials. If needed, exam developers will list additional Strongly Recommended resources to ensure that all topics in the exam are still sufficiently covered. Public libraries may have the textbooks you need, or may be able to obtain them for you through interlibrary loan to reduce textbook costs. You may also consider financial aid, if you qualify, to further help defray the steep cost of textbooks. A section on open educational resources (OER) has been included in this guide to help you locate additional, possibly free resources to augment your study.

Strongly Recommended

This textbook was used by the examination development committee to verify all questions on the exam.

These study materials may be purchased from the Excelsior College Bookstore.

Optional Resources

The examination development committee did not identify any specific Optional resources for this exam. If you would like to explore topics in more depth, we encourage you to refer to available Open Educational Resources (OER).

Reducing Textbook Costs

Many students know it is less expensive to buy a used textbook, and buying a previous edition is also an option. The Excelsior College bookstore includes a buyback feature and a used book marketplace, as well as the ability to rent digital versions of textbooks for as long as students need them. Students are encouraged to explore these and the many other opportunities available online to help defray textbook costs.

Open Educational Resources

There are many resources available online free of charge that may further enhance your study for the exam. Known as Open Educational Resources (OER), these may be textbooks, courses, tutorials, or encyclopedias. Any additional OER that you find independently should be used to augment study—not as replacements for the Strongly Recommended resources.

Most sites for university-based OER can be searched through www.ocwconsortium.org and/or www.oercommons.org.

Sites that specialize in web courses designed by college professors under contract with the website sponsor, rather than in web versions of existing college courses, include:
We have included specific courses that cover material for one or more UExcel® exams from the sites in the listings above. It's worth checking these sites frequently to see if new courses have been added that may be more appropriate or may cover an exam topic not currently listed.

Sites like Khan Academy (www.khanacademy.com) and iTunes U feature relatively brief lessons on very specific topics rather than full courses. Full courses are also available on iTunes U (http://www.apple.com/education/ipad/itunes-u/). We have chosen a few courses and collections for this listing.

General Description of the Examination

The UExcel Business Information Systems examination is based on material typically taught in a one-semester, three-credit, introductory course in Business Information Systems. The content of the examination corresponds to course offerings such as Business or Computer Information Systems, Management Information Systems, Introduction to or Fundamentals of Information Systems, Information Systems and Computer Applications, and Introduction to Computing Information Sciences.

The examination measures comprehension and understanding of general principles and concepts of information systems, including application of information systems in business, impact of information systems on organizations, the technology of information systems, the importance of database management, enterprise systems, decision support systems, and knowledge management systems in pursuit of organizational goals and strategies. The exam also covers topics such as the systems development life cycle and the personal and societal impact of information systems.

Those beginning study for this exam should have a basic proficiency in computer use.

Learning Outcomes

After you have successfully worked your way through the recommended study materials, you should be able to demonstrate the following learning outcomes:

1. Describe what an information system is, its applications in business and its impact on organizations. (Aligns to GECC 1.2)
2. Understand the technology of information systems including hardware, software, networks and data management. (Aligns to GECC 1.2)
3. Describe the various types of business information systems and their uses in the workplace including electronic commerce, enterprise systems, decision support, and knowledge management. (Aligns to GECC 1.2)
4. Understand the components and life cycle of systems development. (Aligns to GECC 1.2)
5. Describe the impact of computers, networks including the internet, on people and society. (Aligns to GECC 1.2)
6. Analyze the relationship between business communications and information systems. Understand how business communication principles impact the effective use of computer applications for collaboration in the workplace. (Aligns to GECC 1.2)

General Education Career Competencies Addressed in this Exam

GECC 1: Oral and Written Communication: Deliver written communication with appropriate content, organization, syntax, mechanics, and style for the audience and purpose.
**Content Outline**

The content outline describes the various areas of the test, similar to the way a syllabus outlines a course. To fully prepare requires self-direction and discipline. Study involves careful reading, reflection, and systematic review.

The major content areas on the Business Information Systems examination, the percent of the examination, and the hours to devote to each content area are listed below.

<table>

      c. Other types
   4. Multimedia
   5. Virtual reality
   6. Other systems

IV. Systems Development

15 PERCENT OF EXAM

Chapter 8

A. Systems Development Components
   1. Project goals and participants
      a. Aligning goals
      b. Stakeholders and users
      c. Systems developers
   2. Approaches
      a. Traditional
      b. Other development techniques
   3. Success factors
   4. Project management tools

B. Systems Development Lifecycle
   1. Feasibility
   2. Analysis
      a. Requirements
      b. Data
   3. Design
   4. Implementation
      a. Acquisition
b. Preparation and rollout

5. Operations
a. Operations
b. Maintenance
c. Review

V. Personal/Social Impact of Computers

10 PERCENT OF EXAM

Chapter 9

A. Work environment
1. Inefficiencies and errors
2. Privacy

B. Crime
1. Computer crime
   a. Cyber terrorism
   b. Identity theft
   c. Hacking
   d. Spyware
   e. Information theft
   f. Patents and copyrights
   g. Scams
2. Recognizing and preventing computer crime
   a. Recovering stolen property, monitoring criminals, assessing crime risk
   b. Corporate security tools
   c. Preventing identity theft, malware, scams
   d. Privacy concerns

C. Ethical issues
The sample questions give you an idea of the level of knowledge expected in the exam and how questions are typically phrased. They are not representative of the entire content of the exam and are not intended to serve as a practice test.

Rationales for the questions can be found on pages 17–19 of this guide. In that section, the correct answer is identified and each answer is explained. The number in parentheses at the beginning of each rationale refers to the corresponding section of the content outline. For any questions you answer incorrectly, return to that section of the content outline for further study.

1. Which term is best defined as a collection of facts organized and processed so that they have value beyond the value of the individual facts?
   1) information
   2) data
   3) technology
   4) numeric

2. Which type of hardware is most closely associated with computation and processing activities?
   1) an automatic scanning device
   2) the keyboard
   3) the main memory
   4) a printer

3. Which section of a computer is part of the central processing unit (CPU)?
   1) disk storage unit
   2) input devices
   3) output devices
   4) arithmetic/logic unit

4. What does the acronym OLED stand for?
   1) original light-emitting diode
   2) organic light-emitting diode
   3) output light-emitting diode
   4) original light-energy diode

5. Which type of software is designed to coordinate the activities and functions of the hardware and various programs throughout the computer system?
   1) application software
   2) system software
   3) rich Internet application software
   4) personal productivity software

6. Which technology runs cables from a carrier’s exchange all the way to a point-of-sale terminal, to allow customers to pay for their purchases?
   1) Bluetooth
   2) ultra wide band (UWB)
   3) near field communications (NFC)
   4) fiber optic communications service (FiOS)
7. Which transmission medium is the best to use when wiring a company’s physical network infrastructure, if low cost and the need to use a common technology are the main selection criteria?
   1) thicknet
   2) coaxial cable
   3) fiber-optic cable
   4) twisted pair

8. Which network communications convention enables network traffic to be routed among all the networks connected to the Internet?
   1) Internet Protocol (IP)
   2) internet service provider (ISP)
   3) uniform resource locator (URL)
   4) fiber optic communications service (FiOS)

9. An Internet-based sales company regularly keeps track of those parts of its Web site that are most frequently visited. What type of analysis is best suited to discern the usage pattern of visitors to these parts of this company’s website?
   1) clickstream analysis
   2) clickthrough analysis
   3) cookie analysis
   4) discovery-driven analysis

10. Within an organization what is the intended functionally of Transaction Processing Systems?
    1) To support managerial decision making by utilizing data provided by a Decision Support System
    2) To immediately track each transaction on-line without the delays of accumulating transactions
    3) To accumulate a specific type of business transaction overtime for eventual processing as a single unit or batch
    4) To capture and process the detailed data necessary to update records pertaining to the fundamental business operations of the organization

11. Of the following types of reports produced by a management information system (MIS), which type of report provides increasingly detailed data about a given situation?
    1) Key indicator report
    2) Demand report
    3) Exception report
    4) Drill down report

12. Which inventory management approach maintains inventory at its lowest possible level without sacrificing the availability of the finished product?
    1) Material requirements planning inventory
    2) Just-in-time (JIT) inventory
    3) Economic order quantity inventory
    4) Flexible manufacturing system inventory

13. Which decision-making approach consists of members spontaneously offering original ideas and fostering of creativity?
    1) Nominal group
    2) Brainstorming
    3) Group consensus
    4) Benchmarking

14. What is a Turing Test?
    1) A statistical test within an inventory control MIS to determine if the EOQ (Economic Order Quantity) has been calculated correctly
    2) A judgmental test to determine if a Decision Support System has produced decisions that are comparable to that of a human decision-maker
    3) A test which attempts to determine if a computer programmed for intelligent behavior can, when interrogated, produce responses which are indistinguishable from those of a human being
    4) A logical test to determine if a Supply Chain Management (SCM) system is learning from its past experience
15. An expert system that plays chess is designed to pick a move, to analyze all the possible results of that move, then to pick another move and analyze those results. When it can no longer find a better move, the expert system moves the chess piece. This is an example of what type of expert system?
   1) reinforcement programming
   2) a robotic system
   3) a dynamic programming system
   4) a natural language processing system

16. Radio Frequency Identification (RFID) tags are used for which of the following actions?
   (Select the 3 that apply.)
   1) processing credit card payments
   2) paying for gas at a pump
   3) using an automatic device in a vehicle to pay for a road toll
   4) tracking and locating items in warehouses
   5) tracking calculation errors in income tax returns

17. In a data flow diagram, which symbol is used to show either the source or destination of the data element?
   1) data flow
   2) process
   3) entity
   4) data store

18. If an end user has a problem with a system while it is in operation, whom should end users contact when a problem is discovered?
   1) systems developers
   2) systems analysts
   3) help desk
   4) the chief information officer (CIO)

19. For most organizations, which aspect of the Systems Development Lifecycle requires the largest expenditures?
   1) analysis
   2) design
   3) implementation
   4) maintenance

20. What has occurred when a student gains access to a school's grading system and modifies their grade from a D to a B?
   1) cyberterrorism
   2) placement of spyware
   3) identity theft
   4) hacking
1.
*1) Information is a collection of facts organized and processed so that they have value beyond the value of the individual facts.
*2) Data consists of raw facts, and real-world things.
*3) Technology can be the means of gathering such data, but is not data itself.
*4) The data is not numeric, it’s alpha-numeric.

2.
1) An automatic scanning device is an input device.
2) The keyboard is an example of input device.
*3) Processing devices include computer chips that contain the central processing unit and main memory.
4) A printer is an output device.

3.
1) Disk storage is not part of the CPU.
2) Input devices are separate from the CPU.
3) Output devices are separate from the CPU.
*4) The arithmetic/logic unit is an integral part of the CPU.

4.
1) See 2).
*2) OLED = organic light-emitting diode
3) See 2).
4) See 2).

5.
1) Application software consists of programs that help users solve particular computing problems.
*2) System software is the set of programs designed to coordinate the activities and functions of the hardware and various programs throughout the computer system.
3) Rich Internet application software is an application software that is available on the Web.
4) Personal productivity software is software designed to increase the personal effectiveness of the user. This is similar to application software.

6.
1) Bluetooth is a wireless communications specification.
2) This is ultra wide band used to connect different devices together.
3) NFC technology allows for credit cards to be near point of sale terminals.
*4) This is a bundled set of communications service on fiber optic cable.

*correct answer
7.
1) Thicknet is a type of coaxial cable. It is not as common or as inexpensive as some of the alternatives.
2) Coaxial cable is common between an ISP and business/consumer but it is not common for the network infrastructure of an organization. It is also not the least expensive alternative.
3) Fiber optic cable is not common and it is not inexpensive.
*4) Twisted pair is extremely common and is relatively inexpensive.

8.
*1) IP is the Internet Protocol.
2) ISP is an Internet service provider.
3) URL is an address for the exact location of a Web page.
4) FiOS is a communications service.

9.
*1) Clickstream analysis is correct. Clickstream analysis is used to analyze the streams of clicks a visitor makes on a particular website to discern website usage behavior.
2) Clickthrough analysis is an analysis of clickthrough rate for assessing success of an online advertising campaign for a particular website.
3) Cookie analysis is done to identify a user on his/her repeat visit to a website.
4) Discovery driven analysis is a data mining technique used to create a profile based on patterns in the data and not to discern website usage pattern.

10.
1) The reverse is true. A TPS provides some of the data for a DSS.
2) This defines OLTP (Online Transaction Processing). Not all Transaction Processing Systems are designed to be online, and some could run in a batch processing mode.
3) This defines a Batch Processing System.
*4) A TPS captures and processes the detailed data necessary to update records pertaining to the fundamental business operations of the organization.

11.
1) A key indicator report summarizes the previous day’s activities.
2) A demand report is specifically requested by an individual or group.
3) An exception report is produced when a situation is unusual or requires management attention.
*4) A drill down report provides increasingly detailed data about a given situation.

12.
1) MRP deals with inventory control when the demand for one item depends on the demand for another item.
*2) JIT maintains inventory at its lowest possible level without sacrificing the availability of the finished product.
3) EOQ is a mathematical calculation to determine the quantity ordered, which minimizes total inventory cost.
4) A flexible manufacturing system represents an approach whereby a manufacturing facility may rapidly and efficiently change from the manufacture of one product to another.

13.
1) A nominal group technique encourage feedback, with the final decision being voted upon. It is a more methodological approach.
*2) Brainstorming consists of members offering ideas “off the top of their heads,” fostering creativity and original thinking in decision making.
3) A group consensus approach forces a group to make a unanimous decision
4) Benchmarking approach allows a company to compare its own practices to those of other “leading” companies.

*correct answer
14.
1) A Turing Test has nothing to do with inventory control.
2) A Turing Test has nothing to do with DSS.
3) A Turing Test is a test of Artificial Intelligence.
4) A Turing Test has nothing to do with Supply Chain Management.

15.
1) Reinforcement programming makes sequential decisions and learns between each decision.
2) Robots are mechanical devices that perform tasks.
3) A dynamic programming is a learning system that decides, analyzes and decides again until no better solution can be found.
4) A natural language processing system allows computers to understand and react to human statements.

16.
1) They are not used to process credit card payments
2) They are used at gas stations to make payments at the pump
3) They are used in vehicles for automatic road toll payment
4) They are used to track and locate items in warehouses
5) They are not used to track calculation errors in income tax returns

17.
1) A data flow symbol is a line that shows direction of movement.
2) A process symbol is the representation of a process that is performed.
3) An entity symbol shows either the source or destination of the data element.
4) A data store symbol indicates a storage location for data.

18.
1) While systems developers may be able to solve a particular problem, they should not be contacted directly.
2) Systems analysts may replicate the problem and find potential solutions, but end users shouldn’t contact them directly.
3) A help desk consists of computer systems, manuals, people with technical expertise, and other resources needed to solve problems and give accurate answers to questions. End users should contact the help desk when problems arise.
4) The chief information officer (CIO) is responsible for the strategic vision of information systems in an organization and rarely will interact with end users having a problem with a particular system.

19.
1) See 4).
2) See 4).
3) See 4).
4) Maintenance of legacy systems includes changes and enhancements to make it meet changing business goals. For many organizations this makes up the largest percentage of the I/T budget.

20.
1) Cyberterrorism is a politically motivated attack on information systems.
2) Spyware is software installed on a personal computer to examine a users actions.
3) Identity theft occurs when someone steals personal information (eg., a SSN) and uses it to impersonate someone else.
4) Hacking is the correct answer, and involves breaking into computer systems.

*correct answer
SECTION FIVE
Taking the Exam

Registering for Your Exam

Register Online
www.excelsior.edu/examregistration
Follow the instructions and pay by Visa, MasterCard, American Express, or Discover Card.

Examination Administration
Pearson Testing Centers serve as the administrator for all Excelsior College computer-delivered exams.

Accessibility Services
Excelsior College is committed to the principle that every individual should have an equal opportunity to enroll in an Excelsior College degree program, to register for courses or examinations in order to demonstrate their knowledge and skills under appropriate conditions, and to complete a degree.

The Accessibility Services Office at Excelsior College is responsible for considering requests for reasonable accommodations for individuals with verifiable, documented disabilities. If you are requesting an accommodation due to a disability/condition, complete a Request for Accommodation form.

Computer-Delivered Testing
The UExcel exams are delivered by computer. You can take this exam either in a Pearson VUE testing center or at your home or office with an online proctor. If you are interested in remote proctoring, visit PearsonVUE OnVUE online proctoring.

The system is designed to be as user-friendly as possible, even for those with little or no computer experience. On-screen instructions are similar to those you would see in a paper examination booklet. You will use either the keyboard or the mouse to submit your answers, depending upon the type of question.

Before taking your exam, we strongly encourage you to go on a virtual tour of the testing center. To access this tour, click the What to Expect in a Pearson VUE test center at the following link: home.pearsonvue.com/test-taker/security.aspx
You also will receive a small, erasable whiteboard if you need one.

Breaks
Breaks are only permitted for exams taken at Pearson VUE Testing Centers, and are not permitted during exams delivered via online proctoring.

Online Proctoring
As of spring 2021, Excelsior is offering an online delivery option for UExcel exams, using OnVUE, Pearson VUE’s online delivery and proctoring service.

You must use a personal (vs. an employer's) computer if you want to take the exam online and not in a testing center, so the exam can be effectively delivered to you.

Breaks are not allowed during an exam taken online from home. You may not leave your seat during an online-proctored exam, so be prepared to sit for two or three hours. If you need extra time, the exam will have to be taken at a PearsonVUE Testing Center, and an accommodation formally requested.
NOTE: English Composition, Spanish, Music, and College Writing will NOT be available for online proctoring.

On the Day of Your Exam

Important Reminders

On the day of your exam, remember to:

• dress comfortably: the computer will not mind that you’re wearing your favorite relaxation outfit
• arrive at the test site rested and prepared to concentrate for an extended period
• allow sufficient time to travel, park, and locate the test center
• be prepared for possible variations in temperature at the test center due to weather changes or energy conservation measures
• bring your ID, but otherwise, don’t weigh yourself down with belongings that will have to be kept in a locker during the test.

Academic Integrity Nondisclosure Statement

All examinees must agree to the terms of the Excelsior College Academic Integrity Policy before taking an examination. The agreement will be presented on screen at the Pearson VUE Testing Center before the start of your exam.

If you choose not to accept the terms of the agreement
• your exam will be terminated
• you will be required to leave the testing center
• you will not be eligible for a refund. For more information, review the Student Policy Handbook at www.excelsior.edu/studentpolicyhandbook.

Student behavior is monitored during and after the exam. Electronic measures are used to monitor the security of test items and scan for illegal use of intellectual property. This monitoring includes surveillance of Internet chat rooms, websites, and other public forums.

UExcel Grade Report

After you complete the exam, you will be issued a UExcel Grade Report for Examinations. See the sample UExcel Grade Report in this content guide.

Grade Appeals

If you believe that your score grade is incorrect, you may appeal your grade to examcredit@excelsior.edu. Details about the appeals process are in the Student Handbook.

What If I Miss My Appointment?

If you don’t cancel or reschedule your testing appointment 24 hours before your test appointment, you will have to pay the full fee of the exam, even if you don’t show up.

Late Arrivals

You will also forfeit the exam fee if you arrive to the test center more than 15 minutes late.

Information About UExcel Exams for Colleges and Universities

A committee of teaching faculty and practicing professionals determines the learning outcomes to be tested on each exam. Excelsior College Center for Educational Measurement staff oversee the technical aspects of test construction in accordance with current professional standards. To promote fairness in testing, we take special care to ensure that the language used in the exams and related materials is consistent, professional, and user friendly. Editorial staff perform systematic quantitative and qualitative reviews to ensure accuracy, clarity, and compliance with conventions of bias-free language usage.

Excelsior College, the test developer, recommends granting three (3) semester hours of lower-level undergraduate credit to students who receive a letter grade of C or higher on this examination. This recommendation is endorsed by the American Council on Education. Other colleges and universities also recognize this exam as a basis for granting credit or
advanced standing. Individual institutions set their own policies for the amount of credit awarded and the minimum acceptable score.

Business Information Systems Exam Development Committee

Kevin F. Hunt, MBA (Suffolk University, Boston MA)
   Adjunct Faculty, Excelsior College

John M. Thompson, MS (Syracuse University, Computer & Information Sciences)
   Adjunct Instructor, Hudson Valley Community College

Phillip Knutel, PhD (The University of Michigan, Ann Arbor)
   Assistant Professor, Bentley University
Excellor College
GRADE REPORT FOR EXAMINATIONS

Contact ID:

Test Date: 11/21/2020

Letter Grade: C

Examination Code and Title: 210 Statistics

Recommended Credit:

3 Lower Level

Your examination results are expressed as a Letter Grade of A, B, C, or F. Your results are automatically verified when they are received at Excellor College. If an error is detected, you will be notified immediately.

Recommended Credit is the number of semester hours credit that Excellor College awards and recommends for your grade. Excellor College awards and recommends credit for letter grades of C or better.

If you plan to take another examination, you may download free content guides and the User's Guide by visiting our website at www.excellor.edu/exams/content-guides/

If you need an Excellor College Official Examinations Transcript to document the credit you have earned for this examination for another institution, the request can be made online by accessing the Excellor College website (www.excellor.edu), logging into your MyExcelsior account, and scrolling down to the For Exams Takers box and clicking on the Request transcripts link. If you do not already have a MyExcelsior username and password, you can obtain one at no cost by accessing the Excellor College website, clicking the Log In to MyExcelsior button, and then clicking the link "Create a MyExcelsior User Account."
