## Bachelor of Science in Electrical Engineering Technology

### Program Educational Objectives

Program Educational Objectives (PEOs) are broad statements that describe what graduates are expected to attain within a few years of graduation. Program Educational Objectives are based on the needs of the program's constituencies.

PEO 1: Apply general and discipline-specific concepts and methodologies to identify, analyze and solve technical problems in the electrical discipline.

PEO 2: Demonstrate an individual desire and commitment to remain technically current with, and adaptive to, changing technologies through continuous learning and self-improvement.

PEO 3: Demonstrate independent thinking, function effectively in team-oriented settings, and maintain a high level of performance in a professional/industrial environment.

PEO 4: Communicate effectively in written and oral forms in a professional/industrial environment.

PEO 5: Perform ethically and professionally in business, industry, and society.

PEO 6: Demonstrate and utilize leadership principles in the field of electrical engineering technology.

### Program / Student Learning Outcomes: What Will I Learn?

Select an outcome statement to see the related measures and results.

Graduates of the Bachelor of Science in Electrical Engineering Technology will be able to:

1. Select and apply appropriate knowledge, techniques, skills, and modern tools of mathematics, engineering technology, and natural sciences, including physics, to solve problems in electrical engineering technology areas.
2. Demonstrate the ability to test, measure, and provide quantitative expressions of natural science phenomena through methodologies including experimentation, observation, and accurate measurement.
3. Apply the fundamentals of algebra, trigonometry, and calculus to problem solving in electrical engineering technology areas.
4. Make oral technical presentations in Standard English using graphics and language appropriate to the audience.
5. Demonstrate proficiency in the written and graphical communication of technical information supported by appropriate technical references using Standard English.
6. Demonstrate a working knowledge of computer usage, including knowledge of one or more computer languages or documentation of the use of one or more computer software packages for technical problem solving appropriate to the electrical engineering technology discipline.
7. Demonstrate technical competency in the core electrical engineering technologies, including electronics, circuit analysis, and digital systems, and in the student's chosen concentration such as electronics, power systems, or nanotechnology.
8. Integrate knowledge of the functional areas of electrical engineering technology from a variety of resources.
9. Demonstrate the ability to analyze, apply design concepts, and implement systems as appropriate to electrical engineering technology and consider their societal and global impact.

10. Participate effectively in groups as a member or leader, and apply project management techniques as appropriate to complete assignments.
11. Demonstrate understanding and commitment to professional, ethical, and social responsibilities, including the effects of culture, diversity, and interpersonal relations.
12. Demonstrate a commitment and ability to continue to engage in self-directed continuing professional development.
13. Demonstrate a commitment to quality, timeliness, and continuous improvement.

### Assessment Methodology

#### Metrics, Assessments, and Levels of Achievement

The table below provides a brief overview of the measures selected to assess program outcomes for the Bachelor of Science in Electrical Engineering Technology program. Assessment of program outcomes includes both direct and indirect measures. Benchmarks have been established to differentiate between three levels of program outcome achievement (highly achieved, meets standard, and needs improvement). These three levels of achievement are color coded and used in the section below to indicate the level of achievement for each measure, for each learning outcome.

Metric Type	Direct Measures		Indirect Measures	
	Assessments	Integrated Technology Assessment Portfolio	Course-Embedded	Exit Alumni Survey
Metrics	The percentage of the ELEC 495 students who receive a satisfactory rating or higher on the given rubric criteria for the learning statements and supporting evidence for the related student outcome.	The percentage of the students who receive a grade of B or higher on two selected course embedded assessments.	The mean of the graduates' perceptions of their achievement of the related program outcomes (on a 6-pt Likert-type scale).	The mean of the graduates' perceptions of their achievement of the related program outcomes (on a 6-pt Likert-type scale).
Highly Achieved	≥ 85%		Mean ≥ 5%	
Meets Standard	70 - 84%		4.0 - 4.99	

Needs Improvement	< 70%	Mean < 4
-------------------	-------	----------

*Note: The results of the one-year post-graduation survey are used as a reference to provide a longitudinal perspective on students' attainment of program (student) outcomes.*

### Capstone Exam Results

A comprehensive capstone examination has been administered to all baccalaureate degree students enrolled in ELEC 495 Integrated Technology Assessment since September 2010. The capstone examination consists of 118 objective questions that assess the most common and most important topics and skills in the six core content areas and the student's respective concentration within the College's baccalaureate degree electrical engineering technology curriculum.

From May 2020 term through March 2021 term, the total number of students who took the capstone exam was 73. The mean score on each of the program's core content areas is shown below:

- 93.7% - Basic Concepts of Electricity
- 94.8% - Alternating Current Circuit Concepts
- 96.1% - Basic Circuit Analysis Methods
- 94.8% - Digital Electronics
- 86.8% - Analog Electronics
- 93.7% - Microcontrollers and Microprocessors
