General Information

Presented in this report are results from employment items on the one-year survey.

Interpreting Results: Care should be taken in interpreting survey results. Survey results can be affected by self-selection bias, in which persons with certain characteristics or opinions are more likely to respond. Particular caution should be taken when the numbers of responses are small because results may be skewed.

Please consider the following guidelines when interpreting survey data:

>   Means: When results are expressed in a chart or table of means, please note the range of values and their meanings, which are listed in a footnote below the chart or table. In general, mean values of 4 or higher on a 6-point Likert scale are considered positive. Similarly, a mean value of 5 or higher is considered positive on a 7-point scale. Throughout the report, means are calculated only for Likert-type items that received five or more responses.

>   Standard deviations: Wherever mean values are presented, please also consider the standard deviations (SD) that accompany them. Standard deviation is a measure of variability in the response to a survey item, such that a small SD indicates less variation (more agreement) among respondents.

>   Frequency tables: As noted above, means are calculated only for Likert-type items that received five or more responses. If fewer than five were received, responses will be displayed in frequency tables, with a numerical count provided for each response. Where charts display survey items in pairs (such as ratings of program outcomes), both items will be displayed in a frequency table if either received fewer than five responses.

Notes:

The graduation dates appearing on the cover of this report represent the requested report period. The dates appearing in the Sample section on page 2 indicate the range of graduation dates among actual survey respondents.

The following symbol may appear in this report:

^   Denotes that one or more survey items displayed in a chart or table expired during the report period and so were not asked of all respondents. An explanatory footnote to this effect has been included beneath charts and tables where this symbol may appear.

One-Year Survey Results

Sample

The one-year survey was sent to 59 graduates. A total of 4 responded, resulting in a response rate of 6.8%. Respondents to the survey graduated between May 1, 2020 and April 30, 2021.

Employment and Professional Affiliations

Are you currently employed? (n = 4)
- Yes, full time 75.0%
- Yes, part time 25.0%

Are you currently working in a field related to the degree you earned at Excelsior College (n = 4)
- Yes 75.0%
- No 25.0%

Are you currently employed in a position that requires an MS in Nursing? (n = 4)
- Yes 75.0%
- No 25.0%

Those who are not employed in a position requiring an MS in Nursing listed the following positions:
- covid vaccines

In which of the following health care settings do you currently work? (n = 4)
- Acute care/hospital inpatient services 75.0%
- Other 25.0%

Those who classified their work settings in the "Other" category listed the following health care settings:
- covid vaccines

Which best describes the nature of your current work? (n = 4)
- Case manager/care coordinator 25.0%
- Clinical nurse specialist 25.0%
- Informaticist 25.0%
- Other 25.0%

Those who described the nature of their work in the "Other" category listed the following roles:
- Pandemic

Which geographic location best describes where you currently work? (n = 4)
- Suburban area 25.0%
- Urban area 75.0%
